Subject: RE: Re meeting in Ranson on Wed. -- some feedback

More about Ranson... below – news article, community facebook page and company's website dedicated to this facility.

Protesters – claim facility is being built near four public schools and two daycare centers within a two mile radius.

Also the following. “They point to [a recent article in Politico](#) reporting that “the Trump administration is suppressing an Environmental Protection Agency report that warns that most Americans inhale enough formaldehyde vapor in the course of daily life to put them at risk of developing leukemia and other ailments.”

“Although their product is arguably efficient and well made, the actual manufacturing process pollutes the air,” Citizens Concerned About Rockwool said in a handout titled Stop Toxic Rockwool. “The use of both coal and slag causes the emissions to be toxic in nature.”
